November 30, 2017

Dear Grower,

Please consider the varieties and quantities of generation zero (G0) seed potatoes you would like to request from the Plant Materials Center (PMC) to plant on your farm in 2019. In order to establish our greenhouse production plans for 2018 at the PMC, we will accept order requests through January 31, 2018. We encourage you to renew your seed stocks as often as possible with disease free seed from the PMC to maintain high quality seed in Alaska potato production. In this regard, we are here to serve you and provide the industry with a healthy start.

Please review the attached list and visit <http://plants.alaska.gov/PotatoSeedProduction.html> for ordering information. If you do not see a variety on the list that interests you, please contact us to see if we can produce the variety or a similar one. Based on production logistics, we are setting a minimum order limit of two pounds per variety. The price per pound is \$15.00.

Please do not hesitate to contact me with any questions.

Sincerely,

Christine Macknicki
Potato Program Technician
(907) 745-8021
