November 29, 2018

Dear Grower,

Please consider the varieties and quantities of generation zero (G0) seed potatoes you would like to request from the Plant Materials Center (PMC) to plant on your farm in 2020. In order to establish our greenhouse production plans for 2019 at the PMC, we will accept order requests through January 31, 2019. We encourage you to renew your seed stocks as often as possible with disease free seed from the PMC to maintain high quality seed in Alaska potato production. In this regard, we are here to serve you and provide the industry with a healthy start.

Review the attached list or visit <http://plants.alaska.gov/PotatoSeedProduction.html> for ordering information. If you do not see a variety on the list that interests you, please contact us to see if we can produce the variety or recommend a similar one. Based on production logistics, we are setting a minimum order limit of two pounds per variety. The price is \$15.00 per pound.

Orders will not be accepted from growers with a delinquent account. Please ensure that past balances are paid before ordering new material. Feel free to contact the PMC office at (907) 745-4469 to verify your account status if necessary. Thank you for your understanding in this matter.

Please do not hesitate to contact me with any questions.

Sincerely,

Christine Macknicki
Potato Program Technician
